## Guard Appointed as New President of JWC Environmental

*Santa Ana, Calif. (September 7, 2018)* — JWC Environmental (JWC), a world leader in wastewater solids reduction and removal equipment, announced today the appointment of Greg Guard as the president of JWC Environmental business. He will lead the company as JWC expands into new international markets through the synergies with the Sulzer sales channels, while ensuring that our customers continue to benefit from best in class service, quality, and cutting-edge technology. Greg will report to Clive Patten, head of Business Unit Water within the Sulzer Pumps and Equipment division.

“Over the last 6 years JWC has experienced unprecedented growth within its core municipal wastewater business, while successfully expanding into adjacent industrial markets.” said Guard. “This success is a testament to the tireless dedication of the talented team at JWC as well our world class channel partners who proudly represent our products every day. I look forward to unlocking the future growth opportunities for JWC by leveraging the global strength of Sulzer while driving both JWC’s technology leadership and operational efficiencies that will translate to incredible value for our customers.”

Guard joined JWC in 2012 to lead the newly created industrial business group and took on responsibility for JWC’s municipal sales in North and South America in 2013. In

2016 Guard was promoted to senior vice president of sales and assumed responsibility for the entirety of JWC's global sales. Prior to working with JWC, Guard held leadership positions in sales and marketing with Waste Management, WasteQuip and ThermoFluids.

Guard will be succeeding Ken Biele who has led the company to record growth over the last 5 years. Biele has decided it is the right time to take up a new challenge outside of JWC and Sulzer. JWC wishes him well in his new role thank him for his leadership through the recent integration of JWC into Sulzer.

## ***About JWC Environmental***

JWC Environmental, a Sulzer Brand, is a world leader in solids reduction and removal system for municipal, industrial and commercial applications. Our solutions include our legendary Muffin Monster grinders, Monster Industrial shredders and Monster Separation headworks screening systems, IPEC industrial wastewater screens and FRC DAF systems. We partner with customers to help them run efficient and compliant wastewater treatment operations as well as solve challenging size reduction problems in industrial processes.

JWC Environmental is headquartered in Santa Ana, California, and has a global network of representatives, distributors and regional service centers to provide customer support. For more information, visit us at [www.jwce.com](http://www.jwce.com).
